

AGCP v2.0.0

Baseline Requirement Traceability Annex

Public implementer and founder reference

Controlled requirement, architecture, normative-statement, schema, interface, registry, and
conformance-test traceability

AGCP.ai Runtime Governance Metrology

Purpose and Use

This public reference consolidates the controlled AGCP v2.0.0 traceability associated with CR-001 through CR-122. It is intended to help founders, implementers, architects, reviewers, and assessors locate the AGCP materials relevant to understanding and implementing each requirement.

This document contains no assessment-target information, target evidence, findings, results, confidence determinations, conformance gaps, procurement conclusions, registry determinations, or other organization-specific content. It does not state whether any particular system satisfies an AGCP requirement.

The identifiers and file references in this annex describe the AGCP v2.0.0 controlled specification and conformance baseline. They are implementation and validation references, not evidence about any assessed target.

Controlled Baseline Identification

Field	Value
AGCP Specification Release	v2.0.0
CR Catalog	CR-001 through CR-122
RTM Dataset	RTM-1.45
Formal Test Case Set	TC-001 through TC-122
Requirement Count	122
Formal Test Case Count	122
Harness Check Count	17
Harness Test Vector Count	54
Controlled Fixture Mapping Count	29
Source RTM	spec/AGCP_Requirements_Traceability_Matrix_(RTM).xlsx
Source Test Mapping	conformance/test-mapping.json

Contents

Purpose and Use	1
Controlled Baseline Identification	1
1 CR-001 – Submit -> Authorized	5
2 CR-002 – Submit -> Pending HITL	6
3 CR-003 – Submit -> Rejected (Hard Invariant Failure)	7
4 CR-004 – Schema Validation Failure	9
5 CR-005 – Provenance Validation Failure	10
6 CR-006 – Tenant Inactive on Submit	11
7 CR-007 – Policy Not Found	13
8 CR-008 – Idempotent Replay (Identical Payload)	14
9 CR-009 – Idempotency Conflict	15
10 CR-010 – GET Authorized Action	17
11 CR-011 – Transient State Not Externally Observable	18
12 CR-012 – Valid Cosign, Quorum Not Yet Met	19

13	CR-013 – Valid Cosign Completes Quorum	21
14	CR-014 – Cosign Wrong State	22
15	CR-015 – Cosign Expired	23
16	CR-016 – Cosign Invalid Signature	25
17	CR-017 – HITL Expiration -> Rejected	26
18	CR-018 – Governance Cancellation -> Rejected	27
19	CR-019 – Commit Authorized Action	29
20	CR-020 – Commit While Pending HITL	30
21	CR-021 – Commit While Rejected	32
22	CR-022 – Authorization Reference Mismatch	33
23	CR-023 – Replay Commit After Executed	35
24	CR-024 – Tenant Suspended Before Commit	36
25	CR-025 – Tenant Decommissioned Before Commit	38
26	CR-026 – Cross-Tenant GET	39
27	CR-027 – Cross-Tenant Cosign	41
28	CR-028 – Cross-Tenant Commit	42
29	CR-029 – Cross-Tenant Policy Resolution	43
30	CR-030 – Cross-Tenant Ledger Access	45
31	CR-031 – Dual Authorized Conflicting Actions	46
32	CR-032 – Stale Authorization After Prior Commit	48
33	CR-033 – Divergent State Assumption Conflict	49
34	CR-034 – Concurrent Authorization Race	51
35	CR-035 – Canonical State Changes During HITL	52
36	CR-036 – Missing Intent	53
37	CR-037 – Missing Target Resource	55
38	CR-038 – Missing Requested Effect	56
39	CR-039 – Expired Proposal	57
40	CR-040 – Malformed Delegation References	59
41	CR-041 – Malformed Evidence References	60
42	CR-042 – Canonical Hash Mismatch	62
43	CR-043 – Missing Mission/Task Lineage	63
44	CR-044 – Broken Delegation Chain	65
45	CR-045 – Conflicting Originating Actor	66
46	CR-046 – Context Attempts to Override Canonical State	68
47	CR-047 – Provenance Continuity Gap	69
48	CR-048 – Canonical State Unavailable	71
49	CR-049 – Stale Canonical State	72
50	CR-050 – Conflicting Canonical-State Sources	74
51	CR-051 – Telemetry Conflicts With Canonical State	75
52	CR-052 – Canonical-State Hash Mismatch	76
53	CR-053 – Structural Refusal Due to Invariant Violation	78
54	CR-054 – Structural Refusal Due to Missing Evidence	79
55	CR-055 – Structural Refusal Due to Canonical-State Conflict	81
56	CR-056 – Refusal Record Missing Attribution	82
57	CR-057 – Refusal Record Not Replayable	84
58	CR-058 – Escalation Required but Missing Artifact	85

59	CR-059 – Escalation Resolved to Commit	87
60	CR-060 – Escalation Resolved to Refusal	88
61	CR-061 – Deferred Authorization Expires	90
62	CR-062 – Missing Canonical-State Reference	91
63	CR-063 – Missing Invariant References	93
64	CR-064 – Missing Evidence Hashes	94
65	CR-065 – Invalid Signer Identity	96
66	CR-066 – Receipt Replay Hash Mismatch	97
67	CR-067 – Evidence Changes Between Proposal and Commit	99
68	CR-068 – Evidence Unavailable at Commit	100
69	CR-069 – Evidence Lineage Gap Across Agents	102
70	CR-070 – Governance Context Preserved Across Handoff	103
71	CR-071 – Downstream Agent Drops Context	104
72	CR-072 – Cross-Domain Delegation Requires Escalation	106
73	CR-073 – REST vs Message Bus Same Result	107
74	CR-074 – Canonically Equivalent Payloads Same Result	108
75	CR-075 – Different Implementations Produce Same Decision	110
76	CR-076 – Same Proposal + Same State + Same Invariants = Same Decision	111
77	CR-077 – Same Proposal Across Distributed Nodes	113
78	CR-078 – Determinism Under Non-Deterministic Agent Inputs	114
79	CR-079 – Authorized Actions Successfully Commit	115
80	CR-080 – Unauthorized Actions Never Commit	117
81	CR-081 – Every Action Follows Valid Lifecycle Transitions	118
82	CR-082 – Derived State Matches Ledger Reconstruction	120
83	CR-083 – Canonical State and Decision Remain Synchronized	121
84	CR-084 – Commit Uses Latest Canonical State	123
85	CR-085 – Decision Fully Reconstructable from Ledger	124
86	CR-086 – Receipt Reproduces Original Decision	126
87	CR-087 – Inadmissible Actions Produce Structural Refusal	127
88	CR-088 – Refused Actions Never Execute	128
89	CR-089 – Implementation Passes AGCP Conformance Suite	130
90	CR-090 – Independent Implementations Produce Equivalent Outcomes	132
91	CR-091 – Degraded Governance State	133
92	CR-092 – DEGRADED as Non-Terminal State	135
93	CR-093 – Re-Evaluation Required from DEGRADED State	136
94	CR-094 – Admissible Set Determination	138
95	CR-095 – Deterministic Adjudication of Competing Futures	139
96	CR-096 – Authority Re-Derivation at Commit	140
97	CR-097 – Evidence Qualification Before Admissibility	142
98	CR-098 – Continuation Integrity Preservation	143
99	CR-099 – Admissible Path Viability Tracking	145
100	CR-100 – Degraded Continuation Detection	146
101	CR-101 – Continuation Recovery Support	147
102	CR-102 – Governance Realization Layer	149
103	CR-103 – State Qualification Prior to Admissibility	151
104	CR-104 – Governance Decision State Suitability	152

105	CR-105 – Composite Proposal Representation	154
106	CR-106 – Governance Dependency Graph Evaluation	155
107	CR-107 – Composite Admissibility Re-Evaluation	157
108	CR-108 – Coupling Classification	158
109	CR-109 – Partial Bind Governance	160
110	CR-110 – Governance Compilation	161
111	CR-111 – Constitutional Validation	163
112	CR-112 – Constitutional Constraint Preservation	164
113	CR-113 – Governance Self-Protection	166
114	CR-114 – Governance Omission Analysis	168
115	CR-115 – Recursive Authority Containment	169
116	CR-116 – Cross-Domain Authority Isolation	171
117	CR-117 – Governance Self-Modification Isolation	172
118	CR-118 – Autonomous Coordination Bounds	174
119	CR-119 – Enforcement Context Availability	175
120	CR-120 – Enforcement Decision Integrity	177
121	CR-121 – Governance Enforcement Binding	178
122	CR-122 – Risk-Based Re-Evaluation	180

1 CR-001 – Submit -> Authorized

Requirement Identity

Field	Controlled Baseline Value
RTM Identifier	RTM-00001
Requirement Group	RG-1 – Lifecycle Governance
Conformance Level	L2 – Ordered Governance Mediation
Formal Test Case	TC-001
Formal Test Case Source	conformance/tests/TC001-TC010.md
Core Specification File	spec/AGCP-Core.docx
Core Specification Section	§5 Lifecycle Governance → Proposal Admission and Authorization

Normative Requirement

A proposal that satisfies all governance constraints SHALL be eligible for authorization.

Architecture and Normative-Statement Traceability

Primary ARM IDs: ARM-204; ARM-801

Supporting ARM IDs: ARM-101; ARM-103; ARM-202; ARM-407; ARM-701; ARM-802; ARM-803

Normative Statement IDs: NS-7.1-01; NS-7.2-03; NS-7.3-01; NS-7.3-02; NS-7.4-02; NS-7.5-04; NS-7.6-01; NS-7.6-02

Test-Generating NS IDs: NS-7.5-04; NS-7.6-01

Conditional NS IDs: *None recorded.*

Contextual NS IDs: NS-7.1-01; NS-7.2-03; NS-7.3-01; NS-7.3-02; NS-7.4-02; NS-7.6-02

Data, Interface, and Registry Traceability

DS IDs: DS-011; DS-012; DS-015

Schema Files: schemas/constraint_evaluation.json; schemas/invariant_evaluation.json; schemas/governance_decision_result.json

IF IDs: *None recorded.*

REG IDs: REG-028; REG-041

Conformance and Executable-Evidence Traceability

Harness Check IDs: CHECK-PROPOSAL-QUALIFICATION; CHECK-GOVERNANCE-DECISION; CHECK-EXECUTION-AUTHORIZATION; CHECK-GOVERNANCE-EVIDENCE; CHECK-APPEND-ONLY-GOVERNANCE-LEDGER

Harness Vector IDs: TV-PROP-001

Fixture References: schemas/examples/ds011-constraint-evaluation-satisfied.json; schemas/examples/ds011-constraint-evaluation-violated.json; schemas/examples/ds012-inv

ariant-evaluation-hard-violation.json; schemas/examples/ds012-invariant-evaluation-preserved.json

Harness Check Mapping Status: APPLICABLE_CHECKS_IDENTIFIED

Test Vector Mapping Status: DIRECT_EXECUTABLE_SCENARIO

Test Vector Disposition: One or more current executable vectors directly realize the formal TC scenario.

Companion-Specification and Source-Artifact Traceability

Companion Specification: *None recorded.*

Companion Disposition: Not Applicable - no Companion_Spec entry for this RTM row.

Controlled Source Artifacts: spec/AGCP-Core.docx; lifecycle/AGCPGovernanceLifecycleModel.md; lifecycle/AGCPNormativeGovernanceProgressionTable.md; conformance/AGCP-Conformance-Test-Vectors.md; conformance/test-mapping.json; schemas/governance_decision_result.json; schemas/constraint_evaluation.json; registries/invariant-type-registry.json; registries/registry-entry-catalog.json

2 CR-002 – Submit -> Pending HITL

Requirement Identity

Field	Controlled Baseline Value
RTM Identifier	RTM-00002
Requirement Group	RG-1 – Lifecycle Governance
Conformance Level	L4 – Execution Authorization Control
Formal Test Case	TC-002
Formal Test Case Source	conformance/tests/TC001-TC010.md
Core Specification File	spec/AGCP-Core.docx
Core Specification Section	§5 Lifecycle Governance → Human-in-the-Loop (HITL) Processing

Normative Requirement

Governance evaluation SHALL support escalation and deferred human adjudication paths.

Architecture and Normative-Statement Traceability

Primary ARM IDs: ARM-804; ARM-801

Supporting ARM IDs: ARM-107; ARM-204; ARM-407; ARM-601; ARM-802

Normative Statement IDs: NS-7.5-01; NS-13.6B-01

Test-Generating NS IDs: NS-7.5-01; NS-13.6B-01

Conditional NS IDs: *None recorded.*

Contextual NS IDs: *None recorded.*

Data, Interface, and Registry Traceability

DS IDs: DS-015

Schema Files: schemas/governance_decision_result.json

IF IDs: *None recorded.*

REG IDs: REG-013; REG-028; REG-041; REG-044; REG-070

Conformance and Executable-Evidence Traceability

Harness Check IDs: CHECK-PROPOSAL-QUALIFICATION; CHECK-GOVERNANCE-DECISION; CHECK-GOVERNANCE-APPROVAL; CHECK-LIFECYCLE-AND-CONTINUATION

Harness Vector IDs: TV-PROP-002

Fixture References: *None recorded.*

Harness Check Mapping Status: APPLICABLE_CHECKS_IDENTIFIED

Test Vector Mapping Status: DIRECT_EXECUTABLE_SCENARIO

Test Vector Disposition: One or more current executable vectors directly realize the formal TC scenario.

Companion-Specification and Source-Artifact Traceability

Companion Specification: *None recorded.*

Companion Disposition: Not Applicable - no Companion_Spec entry for this RTM row.

Controlled Source Artifacts: spec/AGCP-Core.docx; lifecycle/AGCPGovernanceLifecycleModel.md; lifecycle/AGCPNormativeGovernanceProgressionTable.md; conformance/AGCP-Conformance-Test-Vectors.md; conformance/test-mapping.json; schemas/governance_decision_result.json; registries/constraint-type-registry.json; registries/invariant-type-registry.json; registries/rejection-code-registry.json; registries/registry-entry-catalog.json

3 CR-003 – Submit -> Rejected (Hard Invariant Failure)

Requirement Identity

Field	Controlled Baseline Value
RTM Identifier	RTM-00003
Requirement Group	RG-1 – Lifecycle Governance
Conformance Level	L2 – Ordered Governance Mediation
Formal Test Case	TC-003
Formal Test Case Source	conformance/tests/TC001-TC010.md
Core Specification File	spec/AGCP-Core.docx
Core Specification Section	§5 Lifecycle Governance → Structural Refusal

Normative Requirement

Actions that violate mandatory invariants SHALL NOT be authorized.

Architecture and Normative-Statement Traceability

Primary ARM IDs: ARM-105; ARM-204

Supporting ARM IDs: ARM-108; ARM-505; ARM-509; ARM-702; ARM-801; ARM-803

Normative Statement IDs: NS-5.5-01; NS-5.5-02; NS-7.4-05

Test-Generating NS IDs: NS-7.4-05

Conditional NS IDs: *None recorded.*

Contextual NS IDs: NS-5.5-01; NS-5.5-02

Data, Interface, and Registry Traceability

Harness Check Mapping Status: APPLICABLE_CHECKS_IDENTIFIED

Test Vector Mapping Status: DIRECT_EXECUTABLE_SCENARIO

Test Vector Disposition: One or more current executable vectors directly realize the formal TC scenario.

Companion-Specification and Source-Artifact Traceability

Companion Specification: *None recorded.*

Companion Disposition: Not Applicable - no Companion_Spec entry for this RTM row.

Controlled Source Artifacts: spec/AGCP-Core.docx; lifecycle/AGCPGovernanceLifecycleModel.md; lifecycle/AGCPNormativeGovernanceProgressionTable.md; conformance/AGCP-Conformance-Test-Vectors.md; conformance/test-mapping.json; spec/ledger/AGCP-Append-Only-Governance-Ledger-Specification.md; schemas/governed_action_proposal.json; schemas/governance_ledger_event.json; registries/constraint-type-registry.json; registries/invariant-type-registry.json; registries/rejection-code-registry.json; registries/registry-entry-catalog.json

9 CR-009 – Idempotency Conflict

Requirement Identity

Field	Controlled Baseline Value
RTM Identifier	RTM-00009
Requirement Group	RG-1 – Lifecycle Governance
Conformance Level	L3 – Deterministic Governance
Formal Test Case	TC-009
Formal Test Case Source	conformance/tests/TC001-TC010.md
Core Specification File	spec/AGCP-Core.docx
Core Specification Section	§7 Execution Authorization

Normative Requirement

Non-equivalent requests SHALL NOT share governance identity.

Architecture and Normative-Statement Traceability

Primary ARM IDs: ARM-106

Supporting ARM IDs: ARM-101; ARM-203; ARM-604; ARM-706; ARM-803

Normative Statement IDs: NS-6.6A-01

Test-Generating NS IDs: NS-6.6A-01

Conditional NS IDs: *None recorded.*

Contextual NS IDs: *None recorded.*

Data, Interface, and Registry Traceability

DS IDs: DS-021; DS-028; DS-040

Schema Files: schemas/governed_action_proposal.json; schemas/refusal_record.json; schemas/governance_ledger_event.json

IF IDs: *None recorded.*

REG IDs: REG-053

Conformance and Executable-Evidence Traceability

Harness Check IDs: CHECK-APPEND-ONLY-GOVERNANCE-LEDGER; CHECK-IDEMPOTENCY; CHECK-HTTP-INTERFACE-CONTRACT

Harness Vector IDs: TV-PROP-009; TV-PEM-005; TV-POL-005

Fixture References: *None recorded.*

Harness Check Mapping Status: APPLICABLE_CHECKS_IDENTIFIED

Test Vector Mapping Status: DIRECT_EXECUTABLE_SCENARIO

Test Vector Disposition: One or more current executable vectors directly realize the formal TC scenario.

Companion-Specification and Source-Artifact Traceability

Companion Specification: *None recorded.*

Companion Disposition: Not Applicable - no Companion_Spec entry for this RTM row.

Controlled Source Artifacts: spec/AGCP-Core.docx; lifecycle/AGCPGovernanceLifecycleModel.md; lifecycle/AGCPNormativeGovernanceProgressionTable.md; conformance/AGCP-Conformance-Test-Vectors.md; conformance/test-mapping.json; spec/ledger/AGCP-Append-Only-Governance-Ledger-Specification.md; schemas/governed_action_proposal.json; schemas/refusal_record.json; schemas/governance_ledger_event.json; registries/rejection-code-registry.json; registries/registry-entry-catalog.json

10 CR-010 – GET Authorized Action

Requirement Identity

Field	Controlled Baseline Value
RTM Identifier	RTM-00010
Requirement Group	RG-1 – Lifecycle Governance
Conformance Level	L1 – Schema & Envelope Validation
Formal Test Case	TC-010
Formal Test Case Source	conformance/tests/TC001-TC010.md
Core Specification File	spec/AGCP-Core.docx
Core Specification Section	§5 Lifecycle Governance → Lifecycle Initialization

Normative Requirement

Authorized governance state SHALL be externally retrievable.

Architecture and Normative-Statement Traceability

Primary ARM IDs: ARM-802

Supporting ARM IDs: ARM-407; ARM-601; ARM-605; ARM-703

Normative Statement IDs: NS-13.6A-02

Test-Generating NS IDs: NS-13.6A-02

Conditional NS IDs: *None recorded.*

Contextual NS IDs: *None recorded.*

Data, Interface, and Registry Traceability

DS IDs: DS-014; DS-017; DS-038

Schema Files: schemas/proposal_view.json; schemas/execution_authorization_view.json; schemas/governance_lifecycle_record.json

IF IDs: IF-001

Conformance and Executable-Evidence Traceability

Harness Check IDs: CHECK-PROPOSAL-QUALIFICATION; CHECK-LIFECYCLE-AND-CONTINUATION; CHECK-HTTP-INTERFACE-CONTRACT; CHECK-EXECUTION-AUTHORIZATION

Harness Vector IDs: TV-GET-001; TV-EAUTH-001; TV-GART-001; TV-EAUTH-002; TV-GART-002

Fixture References: schemas/examples/ds038-governance-lifecycle-authorized.json

Harness Check Mapping Status: APPLICABLE_CHECKS_IDENTIFIED

Test Vector Mapping Status: DIRECT_EXECUTABLE_SCENARIO

Test Vector Disposition: One or more current executable vectors directly realize the formal TC scenario.

Companion-Specification and Source-Artifact Traceability

Companion Specification: *None recorded.*

Companion Disposition: Not Applicable - no Companion_Spec entry for this RTM row.

Controlled Source Artifacts: spec/AGCP-Core.docx; lifecycle/AGCPGovernanceLifecycleModel.md; lifecycle/AGCPNormativeGovernanceProgressionTable.md; conformance/AGCP-Conformance-Test-Vectors.md; conformance/test-mapping.json; spec/AGCP-HTTP-Interface-Specification.md; schemas/proposal_view.json; schemas/execution_authorization_view.json; schemas/governance_lifecycle_record.json; registries/rejection-code-registry.json; registries/registry-entry-catalog.json; api/interface-catalog.json

11 CR-011 – Transient State Not Externally Observable

Requirement Identity

Field	Controlled Baseline Value
RTM Identifier	RTM-00011
Requirement Group	RG-1 – Lifecycle Governance
Conformance Level	L2 – Ordered Governance Mediation
Formal Test Case	TC-011
Formal Test Case Source	conformance/tests/TC011-TC020.md
Core Specification File	spec/AGCP-Core.docx
Core Specification Section	§5 Lifecycle Governance → Lifecycle State Machine

Normative Requirement

Internal processing states SHALL NOT become canonical externally visible governance states.

Architecture and Normative-Statement Traceability

Primary ARM IDs: ARM-408; ARM-802

Supporting ARM IDs: ARM-401; ARM-407; ARM-605

Normative Statement IDs: NS-13.6A-03

Test-Generating NS IDs: NS-13.6A-03

Conditional NS IDs: *None recorded.*

Contextual NS IDs: *None recorded.*

Data, Interface, and Registry Traceability

DS IDs: DS-014; DS-038

Schema Files: schemas/proposal_view.json; schemas/governance_lifecycle_record.json

IF IDs: *None recorded.*

REG IDs: REG-041; REG-042

Conformance and Executable-Evidence Traceability

Harness Check IDs: CHECK-PROPOSAL-QUALIFICATION; CHECK-LIFECYCLE-AND-CONTINUATION

Harness Vector IDs: TV-GET-002

Fixture References: schemas/examples/ds038-governance-lifecycle-authorized.json

Harness Check Mapping Status: APPLICABLE_CHECKS_IDENTIFIED

Test Vector Mapping Status: DIRECT_EXECUTABLE_SCENARIO

Test Vector Disposition: One or more current executable vectors directly realize the formal TC scenario.

Companion-Specification and Source-Artifact Traceability

Companion Specification: *None recorded.*

Companion Disposition: Not Applicable - no Companion_Spec entry for this RTM row.

Controlled Source Artifacts: spec/AGCP-Core.docx; lifecycle/AGCPGovernanceLifecycleModel.md; lifecycle/AGCPNormativeGovernanceProgressionTable.md; conformance/AGCP-Conformance-Test-Vectors.md; conformance/test-mapping.json; schemas/proposal_view.json; schemas/governance_lifecycle_record.json; registries/invariant-type-registry.json; registries/registry-entry-catalog.json

12 CR-012 – Valid Cosign, Quorum Not Yet Met

Requirement Identity

Field	Controlled Baseline Value
RTM Identifier	RTM-00012
Requirement Group	RG-1 – Lifecycle Governance
Conformance Level	L4 – Execution Authorization Control
Formal Test Case	TC-012
Formal Test Case Source	conformance/tests/TC011-TC020.md
Core Specification File	spec/AGCP-Core.docx
Core Specification Section	§5 Lifecycle Governance → Lifecycle Integrity

Normative Requirement

Governance escalation SHALL support partial quorum accumulation.

Architecture and Normative-Statement Traceability

Primary ARM IDs: ARM-804; ARM-107

Supporting ARM IDs: ARM-204; ARM-407; ARM-606; ARM-801; ARM-802

Normative Statement IDs: NS-13.6B-02

Test-Generating NS IDs: NS-13.6B-02

Conditional NS IDs: *None recorded.*

Contextual NS IDs: *None recorded.*

Data, Interface, and Registry Traceability

DS IDs: DS-026

Schema Files: schemas/governance_approval_artifact.json

IF IDs: *None recorded.*

REG IDs: REG-014; REG-044; REG-070

Conformance and Executable-Evidence Traceability

Harness Check IDs: CHECK-GOVERNANCE-APPROVAL

Harness Vector IDs: TV-GAPP-001

Fixture References: schemas/examples/ds026-governance-approval-completed-quorum.json;
schemas/examples/ds026-governance-approval-partial-quorum.json

Harness Check Mapping Status: APPLICABLE_CHECKS_IDENTIFIED

Test Vector Mapping Status: DIRECT_EXECUTABLE_SCENARIO

Test Vector Disposition: One or more current executable vectors directly realize the formal TC scenario.

Companion-Specification and Source-Artifact Traceability

Companion Specification: *None recorded.*

Companion Disposition: Not Applicable - no Companion_Spec entry for this RTM row.

Controlled Source Artifacts: spec/AGCP-Core.docx; lifecycle/AGCPGovernanceLifecycleModel.md; lifecycle/AGCPNormativeGovernanceProgressionTable.md; conformance/AGCP-Conformance-Test-Vectors.md; conformance/test-mapping.json; spec/AGCP-Human-Review-Specification.md; schemas/governance_approval_artifact.json; registries/constraint-type-registry.json; registries/invariant-type-registry.json; registries/rejection-code-registry.json; registries/registry-entry-catalog.json

13 CR-013 – Valid Cosign Completes Quorum

Requirement Identity

Field	Controlled Baseline Value
RTM Identifier	RTM-00013
Requirement Group	RG-1 – Lifecycle Governance
Conformance Level	L4 – Execution Authorization Control
Formal Test Case	TC-013
Formal Test Case Source	conformance/tests/TC011-TC020.md
Core Specification File	spec/AGCP-Core.docx
Core Specification Section	§5 Lifecycle Governance → Lifecycle Persistence

Normative Requirement

Required governance quorum satisfaction SHALL enable authorization.

Architecture and Normative-Statement Traceability

Primary ARM IDs: ARM-804; ARM-801

Supporting ARM IDs: ARM-107; ARM-204; ARM-407; ARM-802; ARM-803

Normative Statement IDs: NS-13.6B-03

Test-Generating NS IDs: NS-13.6B-03

Conditional NS IDs: *None recorded.*

Contextual NS IDs: *None recorded.*

Data, Interface, and Registry Traceability

DS IDs: DS-026

Schema Files: schemas/governance_approval_artifact.json

IF IDs: *None recorded.*

schemas/examples/ds026-governance-approval-partial-quorum.json

Harness Check Mapping Status: APPLICABLE_CHECKS_IDENTIFIED

Test Vector Mapping Status: DIRECT_EXECUTABLE_SCENARIO

Test Vector Disposition: One or more current executable vectors directly realize the formal TC scenario.

Companion-Specification and Source-Artifact Traceability

Companion Specification: *None recorded.*

Companion Disposition: Not Applicable - no Companion_Spec entry for this RTM row.

Controlled Source Artifacts: spec/AGCP-Core.docx; lifecycle/AGCPGovernanceLifecycleModel.md; lifecycle/AGCPNormativeGovernanceProgressionTable.md; conformance/AGCP-Conformance-Test-Vectors.md; conformance/test-mapping.json; spec/AGCP-Human-Review-Specification.md; schemas/governance_approval_artifact.json; registries/constraint-type-registry.json; registries/invariant-type-registry.json; registries/registry-entry-catalog.json

14 CR-014 – Cosign Wrong State

Requirement Identity

Field	Controlled Baseline Value
RTM Identifier	RTM-00014
Requirement Group	RG-1 – Lifecycle Governance
Conformance Level	L4 – Execution Authorization Control
Formal Test Case	TC-014
Formal Test Case Source	conformance/tests/TC011-TC020.md
Core Specification File	spec/AGCP-Core.docx
Core Specification Section	§8 Governance Evidence → Lifecycle Evidence

Normative Requirement

Human authorization artifacts SHALL only apply to eligible lifecycle states.

Architecture and Normative-Statement Traceability

Primary ARM IDs: ARM-804; ARM-107

Supporting ARM IDs: ARM-106; ARM-407; ARM-802; ARM-803

Normative Statement IDs: NS-13.6B-01

Test-Generating NS IDs: NS-13.6B-01

Conditional NS IDs: *None recorded.*

Contextual NS IDs: *None recorded.*

Data, Interface, and Registry Traceability

DS IDs: DS-026; DS-038

Schema Files: schemas/governance_approval_artifact.json; schemas/governance_lifecycle_record.json

IF IDs: *None recorded.*

REG IDs: REG-013; REG-044; REG-084

Conformance and Executable-Evidence Traceability

Harness Check IDs: CHECK-GOVERNANCE-APPROVAL; CHECK-LIFECYCLE-AND-CONTINUATION

Harness Vector IDs: *None recorded.*

Fixture References: schemas/examples/ds026-governance-approval-completed-quorum.json; schemas/examples/ds026-governance-approval-partial-quorum.json; schemas/examples/ds038-governance-lifecycle-authorized.json

Harness Check Mapping Status: APPLICABLE_CHECKS_IDENTIFIED

Test Vector Mapping Status: NO_DEDICATED_EXECUTABLE_VECTOR

Test Vector Disposition: The formal TC remains authoritative. No dedicated harness vector is currently defined for this scenario.

Companion-Specification and Source-Artifact Traceability

Companion Specification: *None recorded.*

Companion Disposition: Not Applicable - no Companion_Spec entry for this RTM row.

Controlled Source Artifacts: spec/AGCP-Core.docx; lifecycle/AGCPGovernanceLifecycleModel.md; lifecycle/AGCPNormativeGovernanceProgressionTable.md; conformance/AGCP-Conformance-Test-Vectors.md; conformance/test-mapping.json; spec/AGCP-Human-Review-Specification.md; schemas/governance_lifecycle_record.json; schemas/governance_approval_artifact.json; registries/constraint-type-registry.json; registries/invariant-type-registry.json; registries/rejection-code-registry.json; registries/registry-entry-catalog.json

15 CR-015 – Cosign Expired

Requirement Identity

Field	Controlled Baseline Value
RTM Identifier	RTM-00015
Requirement Group	RG-1 – Lifecycle Governance
Conformance Level	L4 – Execution Authorization Control
Formal Test Case	TC-015
Formal Test Case Source	conformance/tests/TC011-TC020.md
Core Specification File	spec/AGCP-Core.docx
Core Specification Section	§5 Lifecycle Governance → Lifecycle Completion

Normative Requirement

Expired governance approvals SHALL NOT remain valid.

Architecture and Normative-Statement Traceability

Primary ARM IDs: ARM-805; ARM-107

Supporting ARM IDs: ARM-606; ARM-802; ARM-803; ARM-804

Normative Statement IDs: NS-13.6B-01; NS-13.6B-06

21 CR-021 – Commit While Rejected

Requirement Identity

Field	Controlled Baseline Value
RTM Identifier	RTM-00021
Requirement Group	RG-2 – Execution Governance
Conformance Level	L4 – Execution Authorization Control
Formal Test Case	TC-021
Formal Test Case Source	conformance/tests/TC021-TC030.md
Core Specification File	spec/AGCP-Core.docx
Core Specification Section	§5 Lifecycle Governance → Idempotent Lifecycle Processing

Normative Requirement

Rejected actions SHALL NOT become operationally real.

Architecture and Normative-Statement Traceability

Primary ARM IDs: ARM-803; ARM-105

Supporting ARM IDs: ARM-108; ARM-201; ARM-211; ARM-702; ARM-802

Normative Statement IDs: NS-13.6A-04

Test-Generating NS IDs: NS-13.6A-04

Conditional NS IDs: *None recorded.*

Contextual NS IDs: *None recorded.*

Data, Interface, and Registry Traceability

DS IDs: DS-017; DS-018; DS-019

Schema Files: schemas/execution_authorization_view.json; schemas/commit_boundary_request.json; schemas/commit_boundary_result.json

IF IDs: IF-001

REG IDs: REG-018; REG-019; REG-029; REG-030; REG-041; REG-050; REG-072; REG-074; REG-076

Conformance and Executable-Evidence Traceability

Harness Check IDs: CHECK-COMMIT-BOUNDARY

Harness Vector IDs: *None recorded.*

Fixture References: schemas/examples/ds018-commit-boundary-request-single.json; schemas/examples/ds019-commit-boundary-result-refusal.json; schemas/examples/ds019-commit-boundary-result-success.json

Harness Check Mapping Status: APPLICABLE_CHECKS_IDENTIFIED

Test Vector Mapping Status: NO_DEDICATED_EXECUTABLE_VECTOR

Test Vector Disposition: The formal TC remains authoritative. No dedicated harness vector is currently defined for this scenario.

Companion-Specification and Source-Artifact Traceability

Companion Specification: *None recorded.*

Companion Disposition: Not Applicable - no Companion_Spec entry for this RTM row.

Controlled Source Artifacts: spec/AGCP-Core.docx; spec/AGCP-HTTP-Interface-Specification.md; api/AGCP-HTTP-Contract.yaml; lifecycle/AGCPGovernanceLifecycleModel.md; lifecycle/AGCPNormativeGovernanceProgressionTable.md; conformance/AGCP-Conformance-Test-Vectors.md; conformance/test-mapping.json; schemas/execution_authorization_view.json; schemas/commit_boundary_request.json; schemas/commit_boundary_result.json; registries/constraint-type-registry.json; registries/invariant-type-registry.json; registries/rejection-code-registry.json; registries/registry-entry-catalog.json; api/interface-catalog.json

22 CR-022 – Authorization Reference Mismatch

Requirement Identity

Field	Controlled Baseline Value
RTM Identifier	RTM-00022
Requirement Group	RG-2 – Execution Governance
Conformance Level	L4 – Execution Authorization Control
Formal Test Case	TC-022
Formal Test Case Source	conformance/tests/TC021-TC030.md
Core Specification File	spec/AGCP-Core.docx
Core Specification Section	§8 Governance Evidence → Lifecycle Transition Evidence

Normative Requirement

Execution SHALL remain bound to the specific authorization artifact that approved it.

Architecture and Normative-Statement Traceability

Primary ARM IDs: ARM-203; ARM-213

Supporting ARM IDs: ARM-106; ARM-201; ARM-212; ARM-302; ARM-308; ARM-606

Normative Statement IDs: NS-9.6A-02

Test-Generating NS IDs: NS-9.6A-02

Conditional NS IDs: *None recorded.*

Contextual NS IDs: *None recorded.*

Data, Interface, and Registry Traceability

DS IDs: DS-017; DS-018; DS-019

Test Vector Mapping Status: SUPPORTING_EXECUTABLE_COVERAGE

Test Vector Disposition: No dedicated one-to-one vector exists; the listed vectors exercise supporting behavior while the formal TC remains the authoritative verification procedure.

Companion-Specification and Source-Artifact Traceability

Companion Specification: *None recorded.*

Companion Disposition: Not Applicable - no Companion_Spec entry for this RTM row.

Controlled Source Artifacts: spec/AGCP-Core.docx; spec/AGCP-Policy-Evaluation-Contract.md; spec/ledger/AGCP-Append-Only-Governance-Ledger-Specification.md; conformance/AGCP-Conformance.md; conformance/AGCP-Conformance-Test-Vectors.md; conformance/test-mapping.json; conformance/AGCP-Test-Matrix.md; schemas/governance_receipt.json; schemas/governance_ledger_event.json; registries/constraint-type-registry.json; registries/invariant-type-registry.json; registries/rejection-code-registry.json; registries/registry-entry-catalog.json; api/interface-catalog.json

87 CR-087 – Inadmissible Actions Produce Structural Refusal

Requirement Identity

Field	Controlled Baseline Value
RTM Identifier	RTM-00087
Requirement Group	RG-9 – Governance Continuity & Multi-Agent Coordination
Conformance Level	L2 – Ordered Governance Mediation
Formal Test Case	TC-087
Formal Test Case Source	conformance/tests/TC081-TC090.md
Core Specification File	spec/AGCP-Core.docx
Core Specification Section	§6 Governance Decision Function → Structural Refusal

Normative Requirement

Governance SHALL reliably detect inadmissibility.

Architecture and Normative-Statement Traceability

Primary ARM IDs: ARM-204; ARM-105

Supporting ARM IDs: ARM-108; ARM-202; ARM-402; ARM-609; ARM-701

Companion Specification: Proposed: spec/AGCP-Continuation-Integrity.md

Companion Disposition: spec/AGCP-Continuation-Integrity.md - Planned / Non-Baseline; proposed roadmap/backlog artifact; not adopted and not required for AGCP v2.0.0 conformance or for this row's Accepted/Complete status.

Controlled Source Artifacts: spec/AGCP-Core.docx; spec/AGCP-HTTP-Interface-Specification.md; api/AGCP-HTTP-Contract.yaml; lifecycle/AGCPGovernanceLifecycleModel.md; lifecycle/AGCPNormativeGovernanceProgressionTable.md; conformance/AGCP-Conformance-Test-Vectors.md; conformance/test-mapping.json; spec/AGCP-Policy-Evaluation-Contract.md; schemas/deterministic_adjudication_result.json; api/interface-catalog.json

96 CR-096 – Authority Re-Derivation at Commit

Requirement Identity

Field	Controlled Baseline Value
RTM Identifier	RTM-00096
Requirement Group	RG-2 – Execution Governance
Conformance Level	L4 – Execution Authorization Control
Formal Test Case	TC-096
Formal Test Case Source	conformance/tests/TC091-TC100.md
Core Specification File	spec/AGCP-Core.docx
Core Specification Section	§12 Continuation Integrity → Dependency Failure Detection

Normative Requirement

Execution authority SHALL be re-derived from current canonical state at commit time.

Architecture and Normative-Statement Traceability

Primary ARM IDs: ARM-302; ARM-202

Supporting ARM IDs: ARM-201; ARM-203; ARM-210; ARM-401; ARM-403; ARM-406

Normative Statement IDs: NS-8.4-02; NS-8.6-05; NS-8.6A-01; NS-8.6A-02; NS-8.6A-03; NS-12.1-01; NS-12.1-02; NS-12.2-01; NS-12.5-01; NS-12.5-02; NS-12.6-02; NS-13.6-01

Test Vector Mapping Status: NO_DEDICATED_EXECUTABLE_VECTOR

Test Vector Disposition: The formal TC remains authoritative. No dedicated harness vector is currently defined for this scenario.

Companion-Specification and Source-Artifact Traceability

Companion Specification: Proposed: spec/AGCP-Composite-Governance.md

Companion Disposition: spec/AGCP-Composite-Governance.md - Planned / Non-Baseline; proposed roadmap/backlog artifact; not adopted and not required for AGCP v2.0.0 conformance or for this row's Accepted/Complete status.

Controlled Source Artifacts: spec/AGCP-Core.docx; spec/AGCP-Policy-Evaluation-Contract.md; schemas/proposal_submit_request.json; schemas/governed_action_proposal.json; schemas/bind_set.json; schemas/commit_boundary_request.json; schemas/commit_boundary_result.json; schemas/governance_evidence.json; conformance/AGCP-Conformance-Test-Vectors.md; conformance/test-mapping.json; registries/invariant-type-registry.json; registries/registry-entry-catalog.json; api/interface-catalog.json

106 CR-106 – Governance Dependency Graph Evaluation

Requirement Identity

Field	Controlled Baseline Value
RTM Identifier	RTM-00106
Requirement Group	RG-11 – Multitenancy & Governance Isolation
Conformance Level	L4 – Execution Authorization Control
Formal Test Case	TC-106
Formal Test Case Source	conformance/tests/TC101-TC110.md
Core Specification File	spec/AGCP-Core.docx
Core Specification Section	§13 Cross-Domain Authority Isolation → Cross-Domain Evidence

Normative Requirement

Governance evaluation SHALL preserve dependency relationships required for admissible composite execution.

Architecture and Normative-Statement Traceability

Primary ARM IDs: ARM-208

Supporting ARM IDs: ARM-203; ARM-205; ARM-206; ARM-207; ARM-216

Normative Statement IDs: NS-9.6B-02

Test-Generating NS IDs: NS-9.6B-02

Conditional NS IDs: *None recorded.*

Contextual NS IDs: *None recorded.*

Data, Interface, and Registry Traceability

DS IDs: DS-013; DS-018; DS-019; DS-020; DS-021; DS-036

Schema Files: schemas/proposal_submit_request.json; schemas/commit_boundary_request.json; schemas/commit_boundary_result.json; schemas/governance_evidence.json; schemas/governed_action_proposal.json; schemas/governance_dependency_graph.json

IF IDs: IF-002

REG IDs: REG-051; REG-052

Conformance and Executable-Evidence Traceability

Harness Check IDs: CHECK-GOVERNANCE-DECISION; CHECK-COMMIT-BOUNDARY

Harness Vector IDs: *None recorded.*

Fixture References: schemas/examples/ds018-commit-boundary-request-single.json; schemas/examples/ds019-commit-boundary-result-refusal.json; schemas/examples/ds019-commit-boundary-result-success.json

Harness Check Mapping Status: APPLICABLE_CHECKS_IDENTIFIED

Test Vector Mapping Status: NO_DEDICATED_EXECUTABLE_VECTOR

Test Vector Disposition: The formal TC remains authoritative. No dedicated harness vector is currently defined for this scenario.

Companion-Specification and Source-Artifact Traceability

Companion Specification: Proposed: spec/AGCP-Composite-Governance.md

Companion Disposition: spec/AGCP-Composite-Governance.md - Planned / Non-Baseline; proposed roadmap/backlog artifact; not adopted and not required for AGCP v2.0.0 conformance or for this row's Accepted/Complete status.
